

PRODUCT SUMMARY SHEET

TOOL/MOULD SEALING

MARBOCOTE
RELEASE TECHNOLOGY

Marbocote Mould Cleaner

Specifically developed solvent cleaner to clean the mould or tool surface to remove traces of dust, dirt, oils or release agent prior to applying the HP Tool sealer range.

Marbocote HP2002 Tool & Mould Sealer

Marbocote® HP2002 Mould and Tool Sealer is designed to seal all types of highly porous substrates including epoxy and polyurethane tooling board, PVC, MDF, gelcoated and non-gelcoated polyester and epoxy composite moulds. HP2002 can also be used to re-condition/enhance the gloss of old moulds. HP2002 can be either wipe or spray applied and produces a high gloss, durable film. The final film is also capable of accepting a further polish if necessary to generate a mirror-like finish.

Marbocote HP7 Release System

A high performance semi-permanent release agent specifically developed to work in combination with the HP Sealer, giving a high gloss finish and easy release with a simple wipe-on application.

Issue 6 – 15.09.15

Note: The user will determine the suitability for use of this product. The recommendations / data given above are based on information we believe to be accurate. They are intended to be used only as a guide for selection for end-use evaluation and do not constitute a product specification. Marbocote cannot assume responsibility for results obtained by use of this product as we have no control over end-use applications or handling. Marbocote therefore specifically disclaims any damage or loss of any kind in relation to the use of this product
